

## Letter of Support for Product Development

To Whom It May Concern,

I, EDOUARD DESMED, express my support for the continued development of SNICA (second version), a novel product offering a healthy alternative to cigarettes, vaping products, and nicotine replacement therapies, while delivering similar psychoactive effects.

This is my relationship with nicotine:

I smoked I've been smoking for years.

The minimum viable product of SNICA (second version) mimics the psychoactive properties of nicotine via oral delivery of its active ingredients. As an early product version, the minimum viable product, does not yet include: rapid absorption, an optimal consumption method, or taste.

I have had the opportunity to evaluate the minimum viable product of SNICA (second version). I confirm that it mimics the psychoactive effects of nicotine without undesirable side-effects. I want to add the following comment:

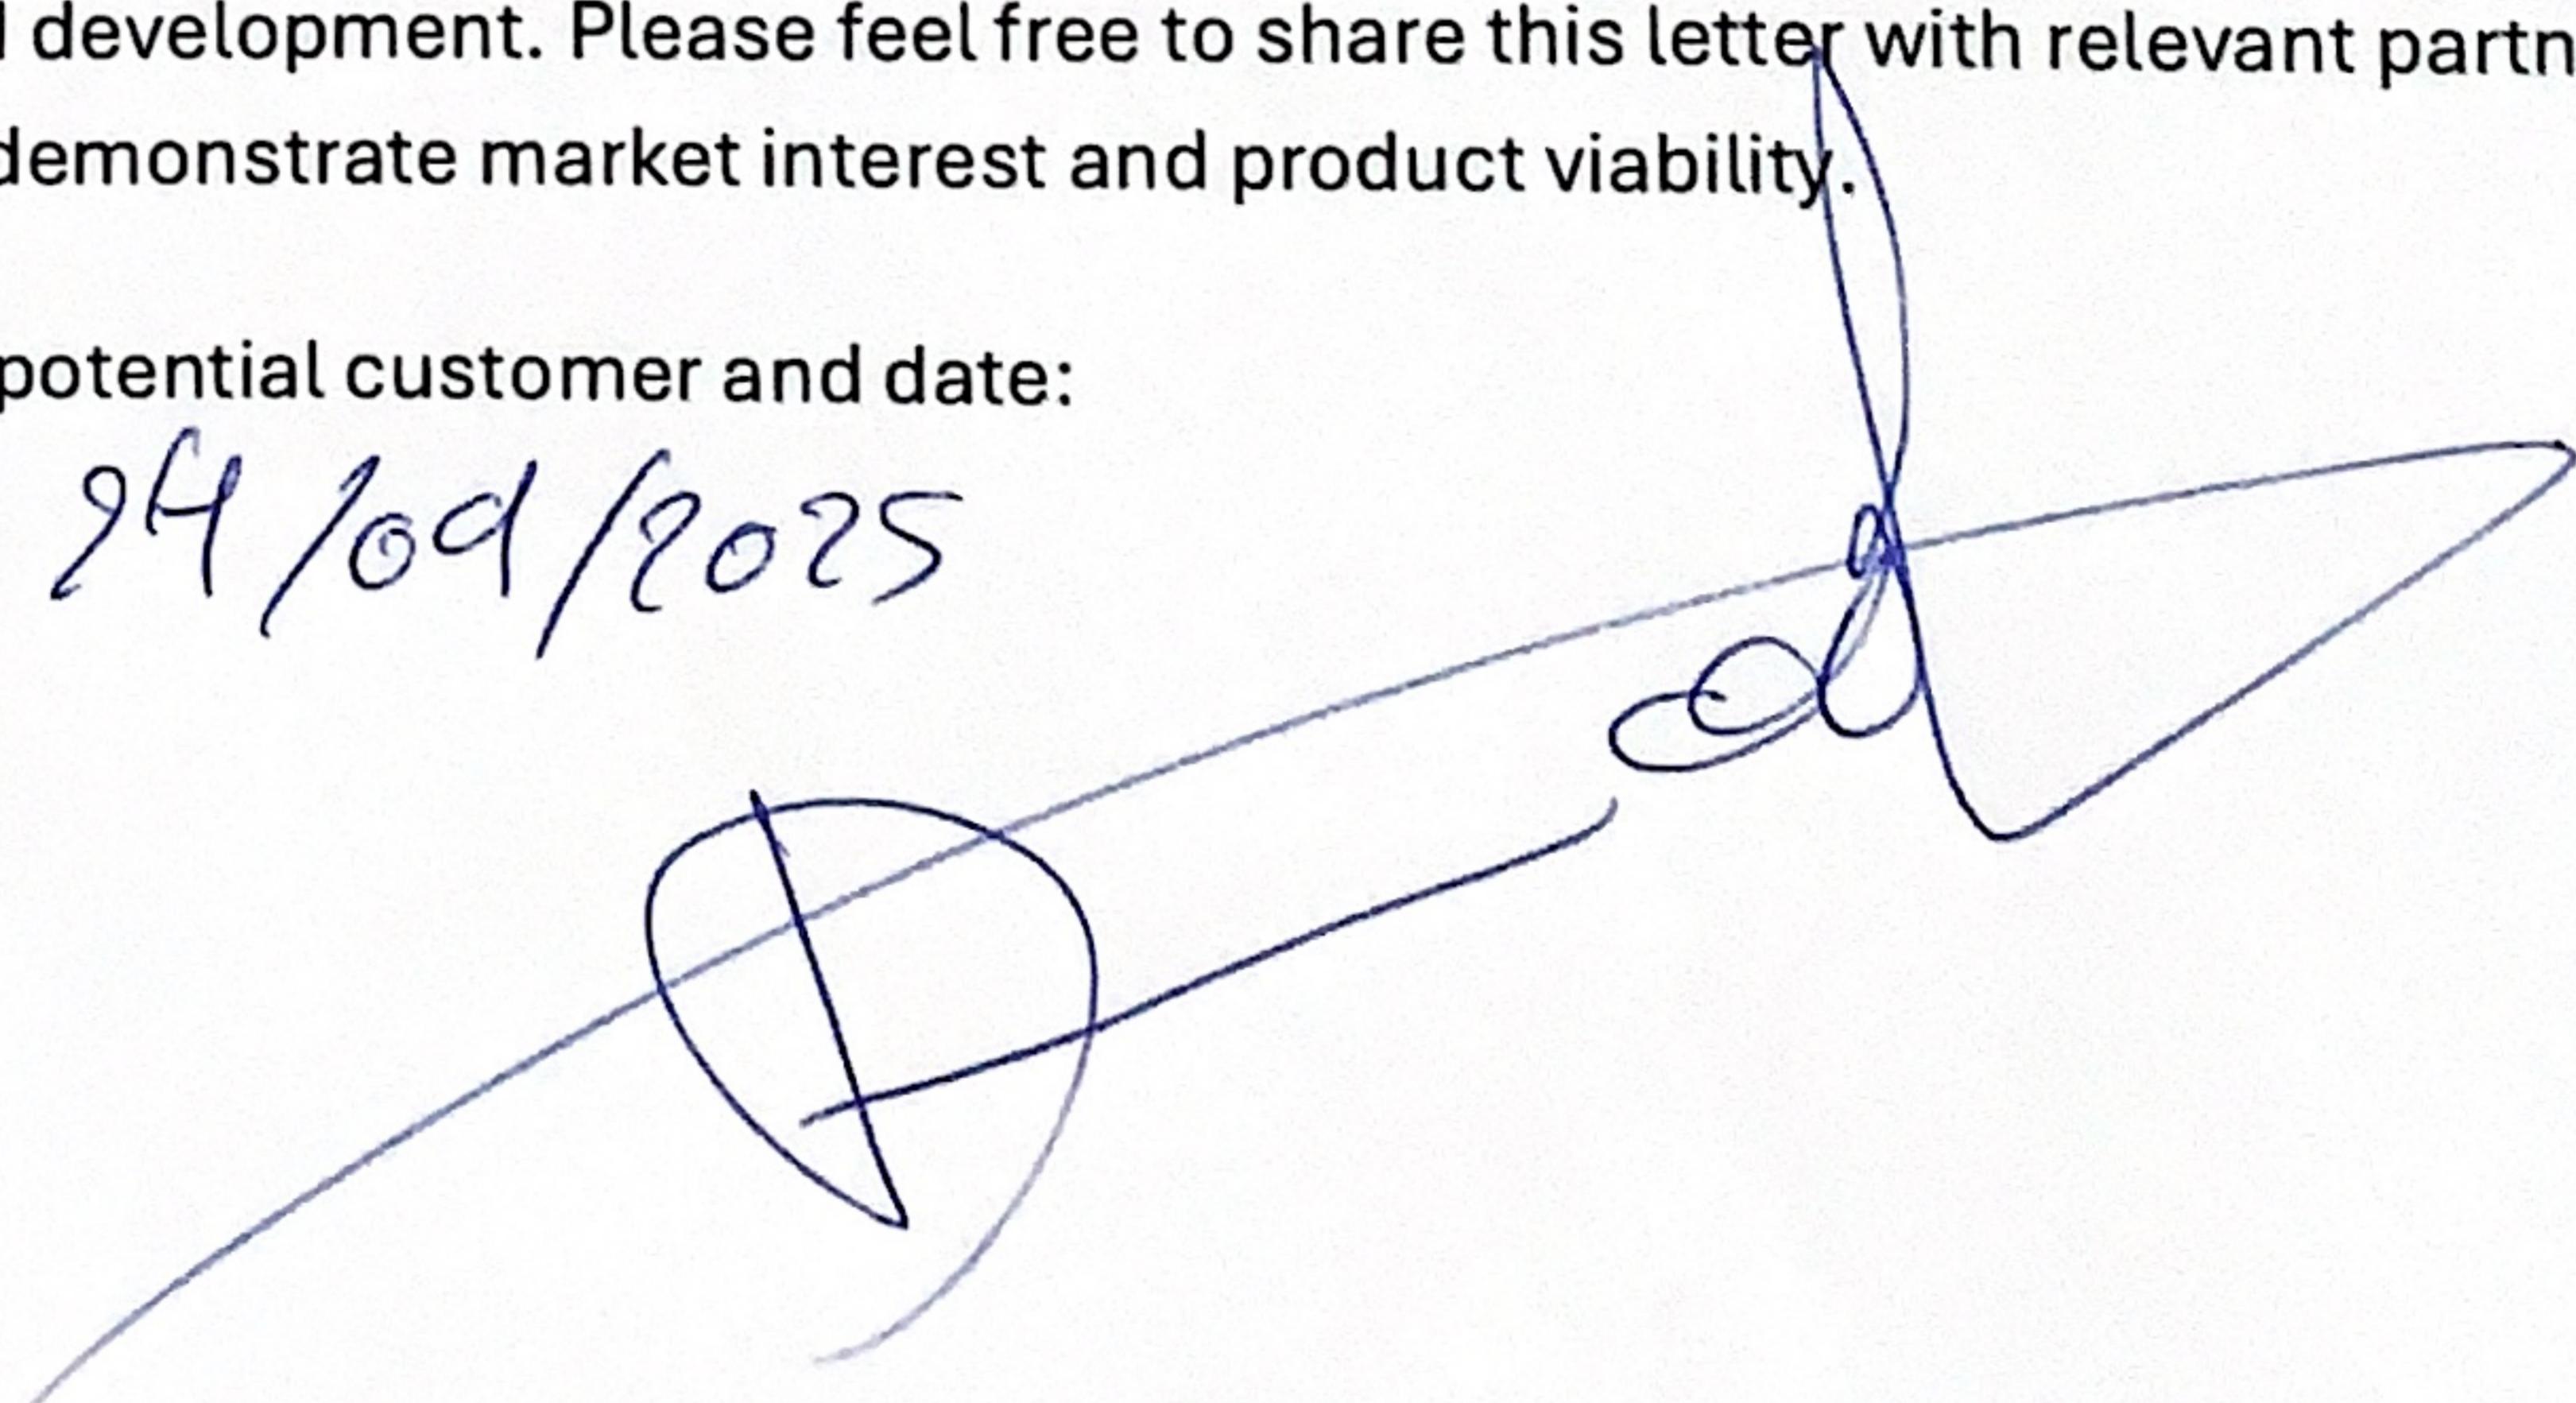

I felt aware.

Based on this experience, I confirm that I would be interested in engaging further with SNICA (second version) upon the release of its commercial version.

I believe SNICA (second version) addresses a critical need in the market and I encourage its continued development. Please feel free to share this letter with relevant partners or investors to demonstrate market interest and product viability.

Signature of potential customer and date:

24/09/2025

A handwritten signature in blue ink that reads "EDOUARD DESMED". The signature is fluid and cursive, with "EDOUARD" on top and "DESMED" below it. It is written over a large, thin-lined oval shape.
